Report of the Mayor

To the Citizens of Rutland:

There is but little for the Mayor to write for the annual report, as from time to time full information concerning the City's affairs has been given to the press.

The City's business is your business, and your Mayor feels that you should be informed of the City's progress as often as possible.

All departments are operating at less cost than for many years, except the Charity Department. As has been pointed out this is mostly owing to unemployment. In order to relieve this we have secured all possible aid from the Federal Government through the WPA, and employment is now furnished through this agency to 325 men employed in putting in sewers, extending water mains, and building sidewalks, curbing, etc. A year ago 500 men were so employed.

The very full and accurate report of the Commissioner of Public Works will repay your reading, as it is a record of greater progress in necessary city improvements than has been accomplished for many years, and at lower costs.

Charity costs have been greatly reduced. Other towns have been required to pay for their dependents living here, thus saving the City some thousands of dollars. There is much yet to do in this department.

The Sewing Department, wages paid by the WPA, has been of great value to the City, not only because of the employment, but it provided thousands of garments that we otherwise would have had to purchase.

We have in operation several other projects such as wood cutting, N. Y. A., and several other projects under the Works Progress Administration.

We are completing a card index of every unemployed person between the ages of 17 and 65 in Rutland, and adding to that list all persons on WPA projects, so as to be in a position to determine at any time the name, occupation and dependents of those needing work or aid. This will be needed later.

In our Police Department our Chief of Police has been as efficient and obliging as any man could be in his position. I believe it is the duty of the men under him to get familiar with the State laws and the City ordinances and see that they are enforced without undue pressure from their superiors.

By considerable effort the parking laws have been fairly well enforced. I believe it would be advisable to have another motor-

cycle mounted officer to check the law breaking speedsters, this man to be on duty at least afternoons and evenings.

I wish to thank the heads of all the Departments for their aid and cooperation. To our Overseer of the Poor and our City Attorney I am especially grateful.

My thanks are due to the Board of Aldermen who have voted all appropriations and cooperated in aiding projects enough to give employment to all the workers the WPA would grant us the right to employ.

Through the efforts of the Industrial Committee of the Chamber of Commerce, an industry has been located here giving employment to over 90 persons, and this firm aims to employ at least 200 hands within the year.

I beg the aid and cooperation of all citizens in anything they can do to relieve unemployment. That is our greatest problem from now on.

Respectfully,

HENRY H. BRANCHAUD,
Mayor.

Report of City Treasurer

To the Honorable City Council:

Gentlemen:—I herewith present to you my report as City Treasurer for the fiscal year ending December 31, 1936.

RECEIPTS

Taxes received by City Treasurer:			
Regular Tax.....	\$442,786 37

Report of Commissioner of Public Works

FOR THE YEAR 1936

The Honorable City Council:

Gentlemen:

The construction and maintenance activities of the Department of Public Works and associated Federal Relief Projects, together with their costs, are shown in this report for the year 1936.

Each division of the department was able to show balances ranging from substantial to very large at the end of the year.

The financial statement based on actual receipts of the City Treasurer and expenditures, including inter-department charges and credits, for the period January 1, 1936, to December 31, 1936, is as follows:

Department	Receipts	Expenditures	Balance
Street.....	\$44,370 69	\$42,657 04	\$1,713 65
Sewer.....	5,443 32	5,298 90	144 42
Sidewalks.....	577 19	299 58	277 61
General.....	4,995 35	4,851 89	143 46
Water.....	49,600 53	37,593 39	12,007 14
	\$104,987 08	\$90,700 80	\$14,286 28
WPA.....	\$9,880 09	\$9,801 29	\$78 80
WPA—Fire Station...	5,000 00	4,998 54	1 46
WPA Sidewalks and Curbs			
Assessments.....		\$10,541 62	
City's share.....		10,237 74	
Total material.....		\$20,779 36	

The Street Department funds were budgeted ahead to take care of possible snow storms which usually occur during the last two weeks of the year. Due to the unseasonably mild weather, this did not happen and the department was able to turn back the large balance of \$1,713.65. Sewers, Sidewalks and General all had balances as shown.

The Water Department receipts were \$9,635.14 in excess of appropriations made, which together with the unexpended portion of appropriated funds made a balance of \$12,007.14. In addition to this the Sewer Department appropriation of \$5,000.00 came from Water receipts.

The W. P. A. Sidewalk and Curb expenditures shown were for materials, equipment and trucking. The amount of concrete walk and curb built totaled 34,297 feet, or 6½ miles. Making allowance for a few assessments paid ahead on one street, the City's and property owner's shares were the same.

There remains \$14,762.59 from the City's \$25,000.00 authorized fund. This will built about 47,000 additional feet of walks and curbs in 1937.

COST COMPARISONS

It is interesting to compare the 1936 costs with former years because the reduction has been generally steady from year to year.

Department	Average Expenditures		Average Expenditures	
	1927-1931	1932-1935	1935	1936
Street.....	\$69,236 60	\$46,053 66	\$45,389 96	\$42,657 04
*Sewer.....	23,340 82	8,226 03	7,080 98	5,298 03
*Sidewalk.....	13,252 65	1,004 93	1,274 52	299 58
General.....	16,798 62	5,484 55	4,609 21	4,851 89
D. P. W. Total..	\$122,628 69	\$60,769 17	\$58,354 67	\$53,107 41
Water.....	62,679 24	42,837 47	40,253 65	37,593 39
Total All.....	\$185,307 93	\$103,606 64	\$98,608 32	\$90,700 80

*Prior to 1932 the Sewer and Sidewalk Departments carried on a construction program which has been replaced entirely, or in part by WPA during the last three years.

The expenditures during 1936 were 92% of those in 1935, a drop of 8%. They are only 49% of the yearly expenses prior to 1932 and 88% of the average yearly costs during the years 1932 to 1935.

1936

EXPENDITURES FOR PUBLIC WORKS & WATER

Total \$90,700.80

STREET DEPARTMENT

The comparative decrease in expenditures over a ten year period shows that costs are being kept at a minimum while performing the necessary work and services.

Av. 1927-31		\$69,236.60
" 1932-35		\$46,053.66
1935		\$45,389.96
1936		\$42,657.04

The permanent pavement work financed by State-Aid and \$1,000.00 City funds consisted of the widening of Wales Street between Center Street and West Street. The east curb was set back two and one-half feet and the space paved with concrete. All poles on this side of the street were removed.

On Grove Street north of State Street the abandoned car tracks were removed and the track area was paved with concrete for a distance of 500 feet. This work should be continued to Library Avenue next year.

The cost of this concrete paving on both streets, exclusive of City owned equipment, was \$2,267.40.

As in recent years the largest single item and the most important one has been the bituminous treatment of street surfaces with tar and asphalt. Each year this work has been extended as much as funds permit to include a little more street surface that was formerly gravel. The available width of roadway was increased in all cases possible this year by applying tar or asphalt to the edge of the grass on each side. This prevents the gutters from washing out during severe summer storms. The tar and asphalt was applied to 123 streets:

YEAR	Number of Streets Treated	Square Yards Covered	Number of Gallons Used	Rate of Application
1934.....	119	289,058	83,419	0.31
1935.....	122	337,031	82,978	0.25
1936.....	123	358,496	89,287	0.25

The area covered, converted into length of roadway averaging 18 feet wide, was as follows:

1934.....	27.37 miles 18 foot road
1935.....	31.94 " " " "
1936.....	33.94 " " " "

This surface treatment in 1936 to the full width of roadway including gutters has, at the same time, accomplished the surfacing of gutters which was formerly done separately by patching and pouring on tar and asphalt. As a result there was very little

gutter work during 1936 which helps to keep the street expenses within the reduced budget.

The total cost of this surfacing was \$12,512.46. During 1935 the total cost of surface treatment and gutter surfacing was \$12,989.86 and the area covered was about 6% less. This shows that the unit cost of surface treatment was reduced about 9½% in one year. The quantity of sand used to cover the tar and asphalt was 2,635 cubic yards.

The work of snow plowing and removal was much more difficult during 1936 than in past years. Although the total amount of snowfall was not as great as in some previous years, some of the storms were more intense and the drifting of snow caused much trouble and necessitated repeated plowing during the storms. Depth of snow in drifts, on some of the outlying streets, as great as twelve feet are shown by photographs on file.

The major portion of snow removal expense was for labor. The largest weekly payroll since 1931 was in January, 1936 when one week's labor totaled \$1,236.55 in the Street Department alone.

The total cost of snow plowing and removal and sanding icy roads and walks was \$4,389.31 which was the highest since the 1931 total of \$6,395.77. There were, however, five major storms making the average cost \$879.86 which compares very favorably with the average costs of former years.

COMPARISON OF LARGEST SINGLE WEEKLY PAYROLL

	1931	Average 1932 to 1935	1936
Street Dept. only.....	\$1,914 03	\$789 53	\$1,236 55
All Public Works.....	2,678 70	1,237 26	1,339 21

This large expense had to be overcome by careful planning and saving throughout the year and was accomplished as is shown by the preceding tables.

The gravel work consisted largely of maintenance of short sections of streets. This required 1,550 cubic yards of gravel which cost \$1,398.25 in place on the roads. All gravel roads, where traffic required, were treated with calcium chloride to lay the dust and help maintain the surface. The quantity used was 24,100 pounds.

The streets treated with tar and asphalt were kept patched where wear occurred and ditches were dug. The quantity used was 159 cubic yards which is smaller than the 169 cubic yards used in 1935, and a great decrease from the 315 yards used in 1934 and 411 in 1933. This continual decrease in patching shows that the

maintenance cost is decreasing. The 1936 cost was \$1,149.38 as compared with \$3,061.72 in 1933 and the average cost of \$3,413 prior to 1932.

The pavements in the business section were cleaned daily and flushed with water when weather permitted. This work, together with the cleaning of catch basins and removal of dirt, and the cleaning of gutters and removal of mud, cost \$5,496.35 as compared with \$5,649.60 in 1935 and \$5,886.09 in 1934. The horse-drawn flusher became worn out in 1935. Since a new machine costing in the vicinity of \$2,000.00 to \$3,000.00 was out of the question in the present financial condition, the Public Works Department built a trailer unit with a motorized pump at a cost of \$132.42 from second hand truck and equipment parts. A small tractor hauls this unit as well as being used for sidewalk plowing in winter.

There were many small portions of the oldest concrete pavement, some of which had been built about twelve years ago with the earliest type of quick-setting cement, that had worn out. These were replaced to improve the condition of Evelyn Street, Wales Street and West Street. The cost was \$518.32.

All trucks, property and equipment were carefully maintained to prolong their serviceable life as much as possible while the appropriations are limited.

It was necessary to make repairs to the floor of '76 Bridge. This bridge, which is our last wooden structure, is deteriorating to a point where its future life for heavy loads is uncertain, and will require either very extensive rebuilding of wooden truss members or replacement by a modern structure.

The State Highway Department completed the resurfacing of Main Street from Temple Street to Madison Street with an asphaltic mixture. The City had traffic lanes marked with white paint at a cost of \$18.55.

SEWER DEPARTMENT

The expenditures during 1936 were the lowest of any recent year. A large percentage of new sewer construction is now done as WPA projects, while the regular Sewer Department takes care of maintenance and repairs.

Av. 1927-31		\$23,340.82
" 1932-35		\$ 8,226.03
1935		\$ 7,080.98
1936		\$ 5,298.90

Sewer plugs on city mains have been greatly reduced as the result of the new trunk lines and laterals that have been built by

PWA and WPA and the inconvenience to property owners from sewers backing up into cellars is much less than formerly.

Seven new catch basins and one new manhole were built. It was necessary to do more repair work to basins and manholes than usual because the frost heaving was so severe in the Spring.

The removal of obstructions, cleaning of sewers and repairs of broken pipes, cost \$1,267.85 as compared with \$1,558.22 in 1935, \$2,199.33 in 1934 and \$3,147.90 in 1933.

Miscellaneous labor and materials dropped to a new low point of \$155.76. This item averaged \$7,674.17 during the five years 1927-31.

There were 39 new service connections from houses. These were charged at actual cost to the property owners, as were repairs made on private services.

GENERAL DEPARTMENT

This department which makes the necessary repairs to bridges, culverts and guardrails, maintains the City Dump, cares for Main Street Park and supports the Public Works office, has about reached a minimum of expense. No new construction was done during 1936.

Tree trimming on all Federal and State Aid Highways was performed as a WPA project. The General Department took care of trees damaged during storms and in sections where WPA was not operating.

The City Dump was in charge of a caretaker during the entire year. The Main Street Park was kept mowed and raked from Spring until early Winter and some work was done on the Library grounds by the same caretaker.

The comparative costs for ten years are as follows:

Av. 1927-31		\$16,798.62
" 1932-35		\$5,484.55
1935		\$4,609.21
1936		\$4,851.89

SIDEWALK DEPARTMENT

The new concrete sidewalk and curb construction, totaling $6\frac{1}{2}$ miles, was a WPA project and will be described in detail in that section of the report.

Many of these new walks were built in sections that were formerly in bad shape and required constant repairs. As a direct result, the cost of maintenance which was necessary in the regular

Sidewalk Department reached what is doubtless the lowest in a great many years.

Av. 1927-31		\$13,252.65
" 1932-35		\$1,004.93
1935		\$1,274.52
1936		\$299.58

Cold patching with tar was done where most needed.

With the WPA walk and curb construction continuing during 1937 it is expected that a great improvement will be made throughout the city and the maintenance costs kept down.

WATER DEPARTMENT

The work in this department is supervised by Edgar S. Beardsley, who has been in charge since 1926. The expenditures were the lowest since 1925.

Av. 1927-31		\$62,679.24
" 1932-35		\$42,837.47
1935		\$40,253.65
1936		\$37,593.39

The largest project of the year was the new water main on North Main Street. In 1935 669 feet of 8 inch pipe had been laid north of Vernon Street. This was continued 492 feet to Field Avenue. One 8 inch valve was installed. From Vernon Street to North Street, 1864 feet of 10 inch main with two valves were installed. All of this main replaced small pipes that were inadequate for proper fire protection.

On Field Avenue, a new line was being laid at the close of the year, connecting the new North Main Street pipe with Lincoln Avenue. This job, which will be finished in 1937, had 108 feet of 8 inch pipe and one valve in place.

On Prospect Street a new 6 inch main was laid from Washington Street to Madison Street, a distance of 858 feet. One valve and a hydrant were installed.

The Engrem Avenue main was extended east 269 feet with 6 inch pipe. A new valve was placed. This was done to accommodate additional building on this street. The same was necessary on Howard Avenue for a distance of 125 feet. A valve was installed here also.

The Water Department cooperated with several WPA projects to build new water mains. On Curtis Avenue, the work described in the 1935 report was completed, 59 feet of 6 inch pipe and one valve being put in this year.

The Shedd Place WPA main was laid from West Street north 600 feet. As this was a short street, 4 inch reclaimed pipe was used. On Gilrain Avenue, a 4-inch main extension was started just before the end of the year; only 24 feet of pipe were laid. The Stratton Road WPA main, to furnish water for the houses at the extreme southeast corner of the city, was started in December. The 6-inch pipe in place totaled 228 feet. These houses have always depended on local springs for their water supply.

The total cost of these new mains was \$12,022.51. In 1935 \$12,895.36 was spent for similar work, while in 1934 the amount was \$13,761.23.

There were 37 new services installed, bringing the record nearly back to the 1930 mark.

SERVICES INSTALLED

1929	102
1930	41
1931	27
1932	21
1933	18
1934	20
1935	30
1936	37

These new services were charged to the owners of the property where they were installed. The total cost was \$1,159.21.

Service relays and repairs, made necessary by the failure of old pipes in 122 locations, cost the City \$3,335.24. In 1935 this expenditure was \$4,023.18 and in 1934, \$6,065.64. There were, however, more freeze-ups than in 1935.

All supply and distribution mains were repaired whenever necessary, as were hydrants, valves, valve boxes and meters.

The reservoir was cleaned in June. All of the water was drained out, the sides were scrubbed clean, and the bottom was scraped to remove sediment and sand. On Mendon Brook near the water supply intake it was necessary to do considerable work reinforcing and repairing the stone and timber cribbings that were built after the 1927 flood to confine the stream to its channel. The settling basin at the intake was cleaned and damage caused by high water to the gates was repaired.

Small trees were planted on the watershed where cordwood had been cut during the previous year. There is comparatively little open space remaining on the watershed except meadows that still give a good hay crop and the areas where cordwood has been cut last summer. The year's planting consisted of 5,000 red

pine, 5,000 white pine, 20,000 Norway spruce, and 20,000 white spruce. This is double the quantity used last year.

The Cordwood project operated by W. P. A. cut 3,170 cords of fuel to be used during the winter of 1936-37 by the Welfare Department to distribute to needy families. Individual choppers bought fuel on the stump and cut 239½ cords for their own needs. All of the trees cut for cordwood were of no value for timber. A small quantity of ash and maple was sold. The tops of the trees sold for lumber were cut up for cordwood so that no waste resulted. The area where this wood was cut was replanted with evergreens.

The quantity of water used was larger than during the previous years, especially during May, June, July, August and December.

The average registration and the comparison with former years is shown.

	Average Gallons Per Day	Average Gallons per capita per day

Yearly Average ..	3,044,500	176	170	175	158	155
Based on population of 17,300.						

The total expenditures of the Water Department for the year's work were \$36,908.23 of which \$23,052.50, or 62½%, was for labor.

WORKS PROGRESS ADMINISTRATION

The WPA program for the relief of unemployed was carried on very much the same as in 1935. The Federal government paid the labor and the City furnished materials, tools, equipment, trucks, engineering service and administration.

The principal projects were new sewers, concrete walks and curbs, cordwood cutting, back road improvements, park development, Fire Station addition, water mains, painting of state buildings and tree trimming.

The number of men varied throughout the year. In January the working force was 420. This gradually increased until 487

were on the payroll in March and April. Private employment and Federal road jobs reduced this number during the summer to a low point of about 250 during part of June and July. This again increased to 320.

The proportionate expenditures during the year were as follows:

	City's Share	Federal Labor	Total
Concrete walks and curbs.....	\$20,779 36	\$27,236 24	\$48,015 60
Fire Station addition.....	4,998 54	5,838 73	10,837 27
All other WPA.....	9,801 29	153,123 42	162,924 71
Total.....	\$35,579 19	\$186,198 39	\$221,777 58

The City's share of the cost of this work program was 16% during 1936.

DESCRIPTION OF PROJECTS

ARMORY. The drill hall of the armory was painted, the floor was refinished, and some painting was done in the halls and basement. The State of Vermont paid for materials.

CENTER STREET SEWER. A new line of 10-inch tile pipe replaced the old stone sewer east of Court Street a distance of 574 feet.

CREEK ROAD SEWER. The sewer from Ripley Bridge easterly was completed with 386 feet of 10-inch and 568 feet of 8-inch tile pipe.

CRESCENT STREET SEWER. The sewer from the west side of East Creek that formerly emptied into the river was continued across the creek to the Cleveland Avenue trunk sewer with 200 feet of 18-inch concrete pipe.

CURTIS AVENUE SEWER AND WATER. This project was also under construction in 1935. It was completed with 50 feet of 8-inch sewer pipe and 108 feet of 6-inch cast iron water pipe. Both sewer and water now extend from Mussey Street east to the last house between Mussey and Stratton Road.

FOREST STREET. A new sewer is under construction and has been completed from Moon Brook to Plain Street. The pipe in place consists of 268 feet of 15-inch and 360 feet of 12-inch sewer tile.

PARK AND GRANGER STREET SEWER. These streets, like Forest and Plain, had been giving trouble when the small, inadequate sewers became plugged. A larger line is under construction. There has been laid, at the end of the year, 598 feet of 12-inch and 28 feet of 8-inch pipe.

LIBRARY AVENUE AND WATER STREET SEWER. A new sewer consisting of 502 feet of 10-inch and 376 feet of 8-inch pipe, now

drains the houses into the Cleveland Avenue trunk sewer. The old sewer, which emptied into East Creek, caused frequent flooding of cellars.

LIBRARY GRADING. The grounds of the new Rutland Library were improved by removing the old tar driveways and grading the entire ground area.

LINCOLN AVENUE, FIELD AVENUE AND CHURCH STREET SEWERS. The most extensive sewer project was done to provide drainage for the part of the City above Field Avenue. It was necessary to lay larger new pipes on Lincoln Avenue and Field Avenue at a depth sufficient to drain North Church Street. This required 272 feet of 18-inch, 564 feet of 15-inch concrete pipe, and 28 feet of 15-inch tile pipe on Lincoln Avenue; 360 feet of 10-inch tile on Field Avenue and 1,132 feet of 8-inch pipe on North Church Street and Field Avenue.

LITCHFIELD AVENUE SEWER. The 8-inch sewer was extended north 70 feet through ledge to accommodate a new house.

MENDON CORDWOOD CUTTING. Wood to be used for fuel by the needy was cut on the city lands in Mendon. Trees that had no value as timber, as well as tops left from lumber operations, were worked up into 3,170 cords of four-foot wood.

NORTH STREET SEWER. A new 8-inch sewer was laid easterly from Bellevue Avenue 821 feet to provide drainage for the houses that formerly had used cesspools.

NOYES AVENUE SEWER. New 8-inch pipe was laid south from Robbins Street a distance of 378 feet.

PINE HILL PARK. The road from the north end of Evergreen Avenue, through the park toward the northwest corner where the ponds are located, was widened from a path to a width sufficient for two cars. A large recreation and picnic area was cleared and graded on a flat section about three-quarters of a mile north of Evergreen Avenue. The National Youth Administration has built a ski run parallel to and west of this road to provide a winter recreation park.

PINE STREET SEWER. A new sewer, 346 feet of 8-inch tile, was laid southerly from Park Avenue.

REFORMATORY IMPROVEMENTS. Extensive repairs to the Women's Reformatory included painting throughout the interior as well as the exterior trim, building repairs, and grading of the grounds. On Pierpoint Avenue the swampy area around the pond was filled and graded.

ROAD IMPROVEMENTS. Back roads were widened, graded, straightened and banks were sloped. Outlying streets on all sides of the city were thus improved, including Stratton Road, Allen

Street, Curtis Avenue, Jackson Avenue, Gleason Road, Field Avenue, Pearl Street, Vernon Street, North Church Street, Adams Street, Evergreen Avenue, Pierpoint Avenue and Lincoln Avenue.

SHEDD PLACE SEWER AND WATER. An 8-inch sewer was provided to replace cesspools and a 4-inch water pipe to provide sufficient flow were installed for a distance of 600 feet north of West Street.

STRATTON ROAD WATER MAIN. As described in the Water Department report a six-inch main extension from Allen Street to the southeast corner of the city was started in December, as was the extension of the 4-inch pipe on Gilrain Avenue. These will be continued in 1937.

TREE TRIMMING. On all Federal Highways, State-Aid streets and streets in the central section of the city, the trees were trimmed to remove deadwood and repair defective parts. Dead trees were cut down.

VERNON STREET SEWER. A larger pipe to drain Lincoln Avenue was built as far as Adams Street, using 710 feet of 15-inch pipe.

WOODSTOCK AVENUE SEWER. A short extension of 158 feet of 8-inch tile was made east of Stratton Road.

FIRE STATION ADDITION

An additional 2,100 square feet of floor space, including recreation quarters, office and dormitory space, reading room and bathrooms, was provided by the new Fire Station Annex. This occupies the second floor over the City Garage. The cost for materials was \$4,998.54 which included a new heating plant for the entire Fire Station.

SIDEWALKS AND CURBS

This WPA project completed 34,297 feet or 6½ miles of new concrete construction. The property owners pay one-half the cost of materials and equipment and the City pays one-half of the same from bond issue funds. This material and equipment cost was \$20,779.36. The labor costs are paid by the Federal government.

Concrete sidewalks were built in 50 locations and totaled 31,738 feet in length. Curbs were built on 3 streets, a distance of 2,559 feet.

This work was suspended December 17th because the ground was freezing. Construction will be resumed in March or early April of 1937. There remains \$14,762.59 from the City's \$25,000.00 fund which will provide for the building of 47,000 additional feet of curbs and sidewalks.

COSTS OF ALL PROJECTS AND CLASSES OF WORK IN EACH DEPARTMENT

The National Youth Administration has contributed \$3,484.99 in Federal funds for the development of ski runs on Pine Hill and other minor work in connection with the recreation projects of N. Y. A.

CONCLUSION

The continuation of Federal relief in the form of WPA has made 1936, like 1935 and 1934, rank as one of the years of the largest Public Works Construction program ever carried out in the city. Although some city departments, such as Sewer and Sidewalk, have practically eliminated all work except mainten-

ance, the WPA projects have more than replaced them in the amount of work completed.

This large volume of construction has made a great amount of additional engineering design and surveying, preparation of plans, clerical work, cost accounting for the limited personnel of the Engineer's office. All work has been kept up to date, however, and complete records of all construction are on file.

A constant check on expenditures in the regular Public Works Department has made possible the confinement of expenditures within proper limits so that balances remain in all accounts.

While the expenses in Public Works have been reduced to the lowest point in over ten years, all work and services that were necessary have been done in the best manner possible within the limited means. Several classes of work, especially street surface treatment could be made more lasting and smoother riding if more funds were available but with economy and low unit cost of so much importance at the present time we have developed work schedules and methods that enable us to accomplish the work required with the money at our disposal.

I wish to express my appreciation to His Honor the Mayor and the Honorable Board of Aldermen for their assistance and cooperation, and also to the other City Officials and the members of their departments for the many aids that they render from time to time.

The personnel of the Public Works Department deserve credit for their part in accomplishing the completion of the program described in this report.

Respectfully submitted,

EDWARD L. TRACY,
Commissioner of Public Works.

Report of the Commissioner of Public Safety

To the Honorable City Council:

Gentlemen:

I have the honor to submit the following reports covering the activities of the Fire and Police Departments for the year ending December 31, 1936.

FIRE DEPARTMENT

The Fire Department consists of one Chief Engineer, one Assistant Chief, two Captains, 13 Firemen and 9 Call Men.

The apparatus consists of one American LaFrance 75 ft. aerial ladder truck purchased in 1927, one 750 gallon American LaFrance triple combination truck, purchased in 1924, one 750 gallon LaFrance triple combination truck, purchased in 1919, and one Buffalo Quadruple combination truck with a 750 gallon pump, purchased in 1936, to replace a truck purchased in 1915. Also a Cadillac service truck which is in poor condition.

The department responded to 293 calls during the year as follows: telephone 251, bell 36, verbal 5, thermostat 1, being 43 less than in 1935 and 14 special service calls, including the use of inhalater on 3 persons overcome by gas, shutting off ammonia leak, drowning, suicide, etc.

The value of property involved was \$1,277,356.72. The amount of insurance carried on property involved was \$1,234,681.72. There are two losses that have not been settled to date and the loss not including them was \$32,251.58.

The cost of maintaining the fire department for 1936 was \$33,512.88, and the cost of the new truck was \$8,075.00, making the total cost for the year \$41,587.88. The inventory value of the Fire Department is \$70,022.00, and an itemized account of same is on file in the office of the City Treasurer.

POLICE DEPARTMENT

The police department consists of a chief of police, 13 regular police officers (two of the number being sergeants), 2 regular police officers retired (a third member having deceased during the year), and 49 special police officers.

A complete detailed report is on file in the office of the Chief of Fire Department for examination by the public.

Alfred H. Koltonski
Chief Engineer Fire Department

Report of City Attorney

To The Honorable City Council:

Gentlemen:

I herewith present to you my report as City Attorney for the year ending December 31, 1936.

As in other years of the depression, a considerable amount of the work in this department is connected with public welfare administration, both municipal and Federal. Constant attention is required in order that the City might not be charged for persons who should be supported by other towns.

During the year we have removed six insane persons and two dipsomaniacs to State hospitals for treatment. As many as five or six times daily, needy persons and paupers request advice or suggestions regarding their work, care or treatment. Frequently it is possible, by reason of such conferences, to avoid or reduce expense to the City, and to assist the Overseer of the Poor in his endeavor to lessen the cost of City aid.

A number of Ordinances and Charter amendments have been changed and added. The Parking Ordinance especially was rewritten and later adopted, which ordinance, in view of the immensely increased vehicular traffic on our streets, was urgently required. This Ordinance is reported to be operating in a satisfactory manner.

The City brought two major actions during the year; the first, to collect City funds improperly taken, was settled by payment to the City of the amounts so converted; the second, to charge a town for pauper supplies furnished by the City, is now pending in the Supreme Court. Two actions brought against the City have been discontinued. One action against the City is now pending in the United States District Court and will probably be ready for trial late this spring. There have been a number of suits brought in which the City has been joined as trustee, but these have all been disposed of satisfactorily, and without cost to the City. With the exception of the suits in the District Court and Supreme Court, I do not believe there are any cases which will require the appearance of the City Attorney.

The collection of taxes due the City requires considerable attention, and I have been fortunate in assisting the City Constable in collecting many hundreds of dollars in outstanding taxes. Very frequently such collections necessitate considerable effort, as in the cases when the premises are involved in litigation. In other cases, the collection of taxes requires extended proceedings in the Probate Court.

During the year some eighty-four opinions on subjects of major importance were requested and delivered, besides a very considerable number involving everyday matters. Many of these opinions called for discussions and conferences with various Federal officials and agencies.

No salary or fees in this Department have been incurred beyond the amount designated by the City Council.

Since the most of the City's legal work is intimately connected with the problems of the various municipal departments, its results must also depend upon the cooperation and assistance of City officials and departmental heads. I am very happy, therefore, to acknowledge my gratitude, among others, to the Mayor, the members of the Board of Aldermen, and the City Clerk and Treasurer, who have freely given me their time and advice on a great many occasions.

Respectfully submitted,

V. J. LOVELAND,
City Attorney.

Report of the Overseer of the Poor

To the Honorable City Council:

Gentlemen:

I herewith submit my report as Overseer of the Poor for the year ending December 31, 1936.

	\$78,897.72

I am pleased to make the forgoing report and feel confident that the taxpayers of the City of Rutland will be amply satisfied with the outcome of the year's work in the City Charities Department.

The appropriation to the Department of Charities and Corrections for the year 1936 was \$96,000.00; the net expenses were \$72,961.32, or \$23,038.68 less than the appropriation. The net expenses for the year 1935 were \$141,509.69, or \$68,548.37 more than the expenses for 1936. This saving is due largely to the co-operation of Mayor Branchaud, who has aided the department in every possible way. The department has collected \$5,936.40 for the support of families chargeable to other towns, from individuals for board at the city farm and for produce and wood sold from the farm. Aid has been given to 620 families outside the city farm. Although the saving of \$68,548.37 over the 1935 expenses may seem a large sum, I feel that no needy individual has been neglected in order to secure this result.

Under the efficient supervision of Mr. and Mrs. Lewis Gould at the City Farm, 45 inmates were well cared for and 1121 transients were accommodated. An inventory of livestock, farming implements, household furnishings, etc. amount to \$5,945.00. During the year a new garage has been built on the farm premises and the roof of the large Barker Barn has been resurfaced. Due to the competent services of the superintendent, the City Farm has experienced a most successful year. From the gardens 700 bushels of potatoes, 65 bushels of carrots, 900 heads of cabbage, 60 bushels of beets and 200 bushels of corn have been produced. Several hundred cans of vegetables and fruits carefully preserved at the farm kitchen have maintained the inmates during the entire year.

Several projects have been sponsored which have proved a saving to this department. Most beneficial was the Sewing Project from which 6,561 garments were distributed to the needy. This work of sewing to provide clothing for the city dependents was fostered by the Honorable Mayor Branchaud and financed by the Charities Department. The project was carried on under the supervision of Mrs. Ethel J. Smith. For materials used the City paid \$1,143.27 and the Government expenditures totaled \$13,206.82. Of this amount \$10,569.81 was used for salaries, and the remaining \$2,637.01 for current necessities.

At the Canning Kitchen, under the supervision of Mrs. A. H. Butterfield, were preserved 22,060 cans of fruits and vegetables raised on relief gardens. Current expenses amounting to \$194.55 were paid by the City, the Government paying salaries to the employees on this project.

Another project which has saved the City several hundred dollars is the cutting and drawing of 3,170 cords of wood by WPA employees. Of this amount 2,295½ cords of block and split wood and 262 cords of 4-ft. wood have been delivered to the needy. These orders are delivered by the City truck, thus reducing the fuel bill.

In closing, I wish to extend to Mayor Branchaud my grateful appreciation for the loyal support in all my undertakings during the past year, to the Board of Aldermen and City Officials, I express my gratitude for your cooperation, to the members of the office staff go my sincere thanks for your willing efficient service.

Respectfully submitted,

JOHN D. HAUGH,
Overseer of Poor.

Report of the Old Age Assistance Investigator

To the Honorable City Council:

Gentlemen:

So little definite information has been given out as to the results of the operation of the Old Age Assistance in Rutland City that Investigator W. L. Seward has prepared the following figures.

Before giving these figures it is only right to state that the Old Age Assistance rules do not allow giving aid to the following persons:

Anyone on full relief.

Anyone who is an inmate of the Poor House, or any Home, or Charitable Institution where they are cared for.

It is therefore evident that many persons now being cared for by towns and charitable institutions will continue to be so cared for.

As to how many of the persons now being aided by the Old Age Assistance, that would have become charity cases without that assistance, we can only estimate, but we do not believe there would be many. Undoubtedly poor house and charity departments will continue despite Old Age Assistance.

There are in Rutland City 129 persons receiving Old Age Assistance amounting to \$1,665.00, monthly.

Assuming that this continues during the year it would be \$19,980.00.

Of these 129 persons only 38 were, or are on the City's charity roll. These 38 persons receive from Old Age Assistance \$530.00 monthly, or a total of \$6,300.00 if continued the whole year.

The Charity Department is assisting 10 persons who receive Old Age Assistance. This aid at present amounts to \$125.00 per month, or \$1,500.00 a year.

The net benefit therefore to the Charity Department would figure \$4,800.00, or less than \$5,000.00 a year. This in itself is a goodly sum, and many of us can remember that this would have paid one-half or more of our annual charity bill in past years.

But Old Age Assistance is one of the greatest blessings that have come to us. The aid and comfort it gives, and will give to many cannot be estimated in money value.

W. L. SEWARD,
Old Age Assistance Investigator.

Report of the District Nurse

To the Honorable City Council:

Gentlemen:

I hereby submit the following report for the year ending December 31, 1936:

The Rutland Missionary Society, which sponsors the District Nursing Service of the city, has kept a nurse working every day during the year. During the vacation period a substitute was provided. This is their major project every year. Not so much money for welfare work has been available, as the ward canvass which is taken each fall in October was much less, as were the fees received from patients. However, the nurse has made 236 such calls and through the generosity of friends, and the many and various articles of clothing from the W. P. A. sewing project, garments, sheets, cases, towels and baby clothes have been distributed. From other sources bedding, shoes, furniture, fruit, milk and eggs, also toilet articles have been supplied and given out.

Thanksgiving and Christmas aid has been given as in other years.

The nurse's service at the Red Cross First Aid rooms on the Fair Grounds during the Fair, has become a regular feature, and mothers with small children greatly appreciate this service.

The nursing visits have numbered 2058, welfare calls 236. I have cared for 21 maternity cases and made 101 prenatal visits. Supplies have been placed in 135 families, and 63 layettes given to expectant mothers. These layettes have been furnished largely from the Federal WPA sewing project with headquarters at the City Hall, under the supervision of the Charity Department. Several layettes were made by the women of Trinity Mission as their Lenten Offering to the Nursing Service. The King's Daughters of the Mill Village Circle made and donated 3 layettes.

The various welfare groups and charitable organizations, also individuals have given of their time, cars and money to aid the nurse in caring for the sick, the aged, the unfortunate and the unemployed. We have also had the most hearty cooperation

of the Poor Master and his assistants. For this interest, co-operation and material aid the nurse would thank one and all, and bespeak this continuance for the coming year.

The expense of the year has been the salaries of the acting nurse and substitute, \$1,221.00. This has been met by the city appropriation of \$300.00, the annual ward canvass of \$352.26, and the patients' fees of \$142.50. The balance of \$426.24 was paid by the sponsors, the Rutland Missionary Society.

Respectfully submitted,

LUCIE P. CLARK,
District Nurse.

Report of Health Officer

To the Honorable City Council:

Gentlemen:

I herewith submit my report for the year ending December 31, 1936.

Communicable diseases reported and quarantined:

Measles	1067
Scarlet Fever	67
Chicken-pox	52
Whooping Cough	19
German Measles	17
Mumps	8
Typhoid Fever	2
Erysipelas	1
	<hr/>
	1,233

Eleven cases of scarlet fever and one of measles were confined in the Isolation Hospital, the two cases of typhoid fever were hospitalized from neighboring towns.

In May the Board of Health ordered a Schick test of pupils immunized the previous year to determine the value of methods used. The test was applied to 157 pupils with positive results. In October 163 first grade pupils of the Public and Parochial schools were immunized at a cost to the city, including tests, of \$165.91. During the coming year we hope to include vaccination.

The W. P. A. nurses who have worked under the direction of Miss Devlin, school nurse, have been of inestimable value to the City.

369 inspections of stores, restaurants, hotels, etc., were made in conjunction with the Fire Department. All schools were inspected and fire drills were given by Chief Koltonski. We find in some of the restaurants, which mainly dispense beer, a very lax method of washing and sterilizing glasses.

Many complaints were investigated resulting from promiscuous dumping of garbage. We are sadly in need of some more efficient method of garbage collection.

Samples of water were sent daily to the Department of Hygiene for examination, 13 samples were found polluted, most

of which were reported following high water. On inspecting the water shed in August, we found insanitary conditions in Mendon gorge, where the road is close to the stream. Recommendations were made that a fence be erected through this area to eliminate parking.

The reservoir was cleaned the first week in June under the direction of Commissioner Tracy and E. S. Beardsley, Superintendent of the Water Department.

Water samples from the swimming pool were examined daily at the Department of Hygiene with nearly a perfect score for the season. We were complimented by the State Board of Health on the management of the pool as to both sanitation and efficiency of operation by manager Brislin. Some method of heating water should be installed in order that a thorough bath could be had, as it is essential that a shower should be had before entering the pool.

We wish to gratefully acknowledge the aid received from the State Board of Health in many of our problems, and to the various City Departments for their continued cooperation.

Respectfully submitted,

CLARE M. COLE,
Health Officer.

Report of Milk Inspector

To the Honorable City Council:

Gentlemen:

I herewith submit my report for the year ending December 31, 1936.

Total number of dairy and creamery inspections, 803. Much progress has been made by the dairymen in producing quality milk. The dealers have added new equipment which makes a marked improvement in handling milk and milk products.

656 samples of milk and cream were submitted to the State Department of Hygiene for examination and the result of these tests were published monthly in the Rutland Herald.

With the assistance of Mr. R. A. Knowlton of the State Department of Agriculture, we have eliminated many cows infected with contagious mastitis from the dairies.

Six of our creameries are now State licensed, thus insuring an added security of the milk supply of the city.

We have attended four conventions of milk inspectors during the year, by which we have had valuable instruction, peculiar to all phases of milk production and distribution.

The following licenses were issued:

Producers	228
Dealers	16
Wholesalers	3
Total	247

Five Hundred Forty-two Dollars (\$42.00) was collected and turned over to the City Treasurer.

Respectfully submitted,

CLARE M. COLE,
Milk Inspector.

Report of Department of Public Health

Statistics for 1936 compiled from certificates filed in the
City Clerk's office.

Report of Swimming Pool Manager

To the Honorable City Council:

Gentlemen:

I herewith submit my report as manager of the swimming pool for the year ending December 31, 1936.

RECEIPTS

1935 balance.....	\$518 80
377 adult admissions @ 25c each.....	94 25
107 towels @ 5c each.....	5 35
5 family season tickets @ \$8.00 each.....	40 00
10 special adult tickets @ \$1.00.....	10 00
192 children's season tickets @ \$2.00.....	384 00
15 children season tickets @ \$1.00.....	15 00
6,968 children's admissions @ 10c each.....	696 80
Concession.....	60 00

\$1,824 20

EXPENDITURES

Transferred to playgrounds.....	\$100 00
Payrolls.....	858 53
Bus service.....	40 50
Construction of dressing room walks.....	87 53
Trucking service.....	6 00
Repairing winter damage.....	247 23
Laundry.....	6 00
Sterilization (power and chemicals).....	115 00
Miscellaneous expenditures, (soap, tools, paint, cement, kerosene)	100.85

\$1,561 64

Total receipts.....	\$1,824 20
Total expenditures.....	1,561 64

\$262 56

The pool closed for the 1936 season with a balance of \$262.56 on hand. Winter damage caused a considerable rise in expenditures. Valves on the filters were cracked, the chute had to be repaired, and the chlorinating machine repaired. A wooden walk was built in the dressing rooms to replace the worn out rubber walk.

With the assistance of the National Youth Administration, free swimming was again inaugurated. A total of 20,277 took advantage of these free swims. The National Youth Administra-

tion contributed approximately 120 man hours a week at 40c per hour.

I wish to thank the Honorable Mayor and Board of Aldermen for their splendid cooperation. I am grateful to the Health Officer, City Engineer and Chief of the Fire Department and their departments for helping willingly any time I asked. I wish to acknowledge the kindness of the Fair Association for lending park benches for use at the pool.

Sincerely yours,

JOSEPH BRISLIN.

Report of Inspector of Buildings

To the Honorable City Council:

Gentlemen:

I herewith submit the following report for the year ending December 31, 1936:

New Houses.....	27
House Alterations.....	22
House Additions.....	3
House Alterations to Club House.....	1
Porches.....	21
Sunporch.....	1
Remodel Barn into House.....	1
Private Garages.....	42
Remodel Sheds into Garages.....	3
Filling Stations.....	3
Simonizing Station.....	1
Lubritorium.....	1
New Store Fronts.....	4
Warehouses.....	3
Greenhouse.....	1
Marquise.....	1
Mill Addition.....	1
Commercial Buildings.....	5
Lumber and Cement Storage Buildings.....	3
Commercial Building Alterations.....	8
Additions to Business Blocks.....	2
Fuel Oil Tanks.....	8
Sheds and Tool Sheds.....	5
Poultry Houses.....	11
Cow Shed.....	1
Hog Pen.....	1
Move Buildings.....	13
Demolished Buildings.....	7

Respectfully submitted,

GUY E. THAYER,
Inspector of Buildings.

Rutland Free Library

Report of the Board of School Commissioners

To the Mayor, Board of Aldermen and Citizens of the City of Rutland:

Herewith is submitted the report of the Board of School Commissioners for the year ending December 31, 1936.

The problem of the Board in maintaining the schools of the City at the highest possible standard, such as the people of Rutland are entitled to receive, is annually becoming more difficult. To meet this problem necessitates the most rigid economies. Nevertheless, so far we have undertaken to perform our duties in such a manner as to insure the greatest good to the greatest number at the lowest possible expenditure of money.

Under our system of government the school is a public institution in which all of our people should be personally interested. We cannot emphasize too strongly the benefit derived by the school from the active participation of our citizens in its affairs. The student can accomplish far more when the teacher has the full cooperation and support from the parent. The Parent Teacher Associations are doing a great work in making more effective public interest and they deserve the hearty support of every parent in the further development of this noble project.

The Board as the servant of the public is always willing to receive constructive suggestions regarding the administration of the schools in order to increase their efficiency. Our meetings are always open to the public and anyone desiring to attend will be welcome.

During the past year repairs to the different school buildings which were absolutely essential and necessary amounted to \$9,560.00. A new heating plant was installed at the Pine Street School at a cost of \$1,508.00. This expenditure was a necessary one and the plant is working out very efficiently at the present time.

New sidewalks and grading at all schools have been done at a very low cost by taking advantage of the Federal Government funds available for this purpose.

Fuel and light expense amounted to \$10,500.00.

The minimum salary of a teacher is \$1,000.00. This amount in our mind is not adequate, but at the present time is all that can be paid with the working amount we are allotted.

We have employed a full time painter during the past year and feel that we have economized to quite a degree with his efficient services. We intend hiring a full time plumber for the coming year as we feel that a capable man can help us economize along this line very greatly.

By economizing as we have, we have been able to stay out of the red by a very narrow margin. Our financial report shows how closely we were obliged to work in order to keep within our appropriation. The only method of increasing our receipts is by additional taxation. To meet these absolutely necessary expenditures and keep our schools in operation in the future it may become necessary to ask the voters of Rutland for an additional tax. We hope this will not be necessary, but with increasing prices and conditions over which we have no power, it may become a necessity. Our schools should have the support of every citizen in an effort to maintain their efficiency and standing. Without sufficient funds we cannot do this.

It is the public schools of our great country that have made this nation great. The true Americanism that they produce in our young girls and boys is the one thing that has and will carry us by periods of depression and unrest. The salvation of our experiment in government depends, more than any other one thing, upon the public school, and we must cheerfully and willingly meet whatever expense may be necessary to properly continue this most important work.

The primary question as it seems to us is not so much how much is spent for the schools, but whether the money is wisely expended so that we get an adequate return in the way of benefit to warrant expenditures made. With the cuts the teachers had to take during the depression, we felt that it was no more than fair to restore five per cent. This we did.

We feel that our teaching staff, under the able direction of our superintendent, is very competent. During the last year, a resolution was passed which requires a teacher to retire at the age of seventy. This we felt was a good thing. Teachers may

retire at the age of sixty-five if they so desire, but retirement is compulsory at seventy. The Board also resolved not to engage married women as teachers in the future. We felt that it is only fair during these tedious times to give single women full benefit of any opening in our teaching department.

We wish to take this opportunity in assuring the people of the City of Rutland that everything will be done for the interest of the pupil by hiring the most efficient teaching corps available at the allotted salaries, which our funds permit.

Respectfully submitted,

BOARD OF SCHOOL COMMISSIONERS,
By E. E. Hinds, *President*.

Rutland, Vermont, February 1, 1937.

Report of the Superintendent of Schools

To the Board of School Commissioners, the Mayor, the Board of Aldermen and the Citizens of the City of Rutland:

I have the honor of submitting to you the forty-fourth annual report of the Rutland Public Schools and the sixteenth under the present administration.

This report deals with the outcome of public education in Rutland as shown by the present occupation of the graduates of Rutland High School.

The American public high school is a new and unique institution established so that all young people may have an opportunity to secure a more complete education which will prepare them for better living. That the high school has appealed to the imagination and to a proper sense of values of the American people is shown by its growth from an enrollment of about 300,000 in 1890 to an enrollment of over six million today. The faith of our people in the value of the high school is further shown by their willingness to spend several billions of dollars to provide buildings and equipment for high school classes and to assume the burden of providing nearly a billion dollars a year for current expenses.

An attempt has been made in Rutland to evaluate the work of a typical small city high school in terms of the occupations of its graduates covering a period of sixteen years ending in June, 1935. A survey has been made which resulted in locating 1905 of the 1930 boys and girls who graduated during these years and disclosed the fact that these graduates are engaged in over 180 different occupations from accountant to wholesale ice dealer, with only four who landed in jail or committed suicide.

The largest group includes 656 graduates who decided to take advanced courses so that they would be better fitted for a life work. Of this number 474 have already completed their courses and 115 were members of the classes of 1933, 1934 and 1935, most of whom are still in school, leaving about seventy who failed to complete the course they had begun. It appears, therefore, that nearly thirty-five per cent of the graduates of Rutland High School start an advanced course and that nearly ninety per cent of those who undertake advanced courses complete them.

That the older professions are still in favor with young people is shown by the fact that ten are doctors; eleven are lawyers; three are priests and three are ministers; twelve have become dentists, assistant dentists or dental hygienists. In the

newer professions the engineers claim twenty-seven of the graduates, pharmacy nine and architecture two.

As might be expected nurses are numerous with ninety-two graduates and forty-four still in training. In the teacher group are included 102 graduates and twenty-seven in training. We find that sixty-six are teaching in the state, six in the city and thirty outside the state.

The commercial department of the high school appears to serve a useful purpose in fitting young people to serve themselves and society. One hundred-ninety-one are employed as clerks in offices and 122 are working as clerks in stores. The telephone company claims fifteen as operators and one as a supervisor. Fifty-five graduates have become salesmen which may in part be traceable to work in this department.

School people are likely to admit and others often claim that the formal education of the school kills initiative and tends to reduce all people to a dead level of mediocrity. Our study shows that this is a mistaken idea because sixty-three, or about three and one-half per cent, have executive positions in thirty-one different types of enterprise. The largest group, seventeen in number, is composed of merchants who have established a business of their own. A few vocations claim but one person each from these classes and include a city editor, a city engineer, a postmaster, a contractor and a laundry owner.

Fortunately the high school does not unfit young people to become "drawers of water and hewers of wood." Many of these graduates have somehow learned the value of industry and persistence when applied to work which is socially less esteemed even though it is economically necessary and spiritually elevating. Ninety-eight boys are engaged at manual labor and thirty-one girls are employed in domestic service, twenty-six are waiters and waitresses and twenty-one are filling station attendants. The farm has claimed twenty-three, thirteen are truckmen, nine are ushers and four are janitors.

This study tends to show that a considerable amount of oratory and printer's ink has been wasted during the last few years discussing the plight of the recent graduate with respect to employment. Some have even gone so far as to speak of the young people graduating since 1929 as the lost generation. We find a total of ninety-nine unemployed and sixteen in C. C. C. camps. There is, now and then, a graduate engaged on a W. P. A. project, but the number is insignificant. It would seem that the graduates of Rutland High School have found a place for themselves in spite of adverse conditions and contrary to the headlines.

Some people contend that higher education unfits young women for marriage and homemaking. If this argument is advanced with respect to high school education it seems to be in error because of the 965 girls graduating during this period 411 are already married. The economic conditions of the last few years which have delayed marriage in many localities do not seem to operate with such force in Vermont. Our young people may be more courageous, or perhaps our girls are more attractive and irresistible so that delayed marriage is impossible. Four hundred of the girls under consideration are from the classes of 1931 to 1935 with ages ranging from twenty-two to twenty-five, so delayed marriage could not be said to exist as far as they are concerned. Marriage seems to be a safe bet for our graduates.

Traditional occupations do not seem to hamper the graduates of Rutland High School. The complete tabulation of occupations shows that a considerable number have chosen a rather new field for their life work. As typical of this adventuresome spirit it is noted that five are beauticians and two have chosen each of these fields of activity: chiropractor, dietician, landscape gardener, osteopath, and radiostician. One graduate is to be found in each of fourteen other very modern occupations ranging from air craft to teletype operator. Some occupations reported by one individual are modern for the most part and include: baker, barber, and bartenders; professional golf and restaurant hostess; milkman, orchardist, elevator operator and missionary.

Only ten of these graduates report music as their livelihood. Five are teachers and five are working in some other field of music. Of course many others are musicians, but with music as their avocation rather than as their vocation. We have two dancing teachers who are thus closely allied to music. Three young people have become florists which may be due to the fact that love of beauty was aroused in school by music and art.

The outcome of some parts of the school program are not evident in a report of this kind. The courses in practical arts, manual training for example, are not intended to fit young people for a job but are rather intended to give leisure time interests and to increase ability in homemaking by developing talent as a "handy man." The results in this field at Rutland High School have been about as anticipated although nine graduates are reported as plumbers, four as carpenters, and one as a pattern maker.

Government service of various kinds has furnished employment for a little over five per cent of all these young people. Our own city employs eleven of them: six as teachers, three as firemen, one as city engineer and one as assistant city treasurer. One hundred nineteen are employed in state or national service or in

other local communities. Of this number ninety-six are teachers, twelve are in some branch of the mail service, seven are connected with the army or navy, and four are in various services. Judging from this record it will be a long time before all the people will be working for the government.

In view of the fact that about fifty per cent of the pupils who enter school in the first grade in Rutland remain for twelve years and graduate from the high school, the foregoing is a fairly accurate measure of the success of the whole system. But with so much to be done to prepare young people for adequate living we have no right to be complacent about past accomplishments. We need to set up new goals in terms of character, manners and personality and demand spiritual and moral success as well as academic and material success.

Respectfully submitted,

WILLIAM W. FAIRCHILD,
Superintendent of Schools.

Rutland, Vermont, January 28, 1937.

REPORT OF FRANK L. WILLIS & COMPANY
Certified Public Accountants
Concord, N. H.

February 4, 1937

Henry P. Battles, Chairman,
 Finance Committee, Board of Aldermen,
 City of Rutland,
 Rutland, Vermont.

Dear Sir:

In accordance with the instructions of your Committee, we have made an examination of the books and records of the City of Rutland for the year ended December 31, 1936, the results of which are submitted in the text of this report and the following exhibits and schedules:

Exhibit A Consolidated Statement of Operations for the
 Year ended December 31, 1936

Schedule A-1 Summary Statement of Deficiency of Cash
 to Meet Temporary Loans. Deficiency of
 General Fund Revenue

A-2 Deficiency of Cash to Meet Temporary
 Loans

Exhibit B Summary of Fund Appropriation Operations for
 the Year Ended December 31, 1936

Schedule B-1 Detailed Statement of Fund Appropriation
 Operations

B-1-A Details of General Account

B-1-B Reconciliation of Appropriations with
 Budget

B-2 Increases or Decreases of Cash

Exhibit C Consolidated Balance Sheet as at December 31,
 1936

Schedule C-1 Bonds Outstanding

Exhibit D Balance Sheet of Sinking Fund

Schedule D-1 Sinking Fund Operations

These statements are prepared on a cash basis to agree with the totals used by the City Treasurer which we find to be correct. If new methods are authorized it will not be difficult to obtain the additional information needed with which to open the General Ledger.

The form of presentation is different from that used for many years in the City reports mainly to consolidate the essential information regarding departments and funds. In some cases the treatment of certain items is different but the figures on the statements can be checked or reconciled with those used by the Treasurer's Office.

In the following paragraphs we describe many of the amounts in the various statements.

Consolidated Statement of Operations—Exhibit A

On this statement the Revenue and Expenditures of the City are shown by Funds and in total. By Funds is meant separate groupings of Receipts and Expenditures for special purposes and for the General Fund which is a consolidation of the operations of the regular City Departments.

The Revenue from the United States Government, the State of Vermont and from Towns is self-explanatory. Other Revenue includes Licenses, Fees and Sales of Material and Supplies, etc. for the General Fund; for the School Department, Tuition from Individuals, Sales of Books, etc.; for the Water Fund, it includes Water Rentals and Miscellaneous Income. Under Swimming Pool the income comprises admissions charged; under Special Sidewalks it is the total of assessments received from abutters and under the Special Bond Fund the income is interest. A refund on liability insurance on the Main Area Sewer operations is the income of the Special Sewer Fund.

Deficiency Taxes of \$103,938.19 were assessed to liquidate outstanding temporary loans of \$110,000 at December 31, 1935. The balance, \$6,061.81, was paid from General Revenue.

Of the total collected General Taxes for 1936, \$442,786.37 (plus \$2,520.63 which is included in Delinquent Taxes), a total of \$149,299.60 is by law restricted to School purposes; \$12,000 is reserved for the Sinking Fund and the remainder is revenue of

the General Fund. The latter amount is made up as follows:

Unrestricted Revenue	\$262,765 13
Streets	25,965 15
Old Age Assistance	13,364 75
County	1,614 90
	<hr/>
	\$303,709 93

Total Revenue of the City amounts to \$687,408.09, of which \$329,904.49 belongs to the General Fund. Non Revenue receipts from Temporary Loans are \$425,000.00, making a total of \$1,102,408.09 from which Expenditures of \$1,074,263.36 are deducted, leaving an excess of Income over Expenditures of \$38,144.73 which is accounted for by the increase in cash of this amount shown in detail on Schedule B-2.

The General Fund expenditures exceeded revenue receipts by \$64,840.69. To this amount is added the net amount of transfers to other funds of \$6,378.45 to produce a total excess of expenditures over revenue of \$71,219.14. This amount is the Deficiency of Revenue for the year the computation of which is shown on Schedules A-1 and A-2. The details of the transfers from the General Fund appear on Schedule B-1.

General Fund Cash at the end of the year exceeded the balance at the beginning of the year by \$28,780.86. Adding this amount to the excess of expenditures over revenue, \$71,219.14, produces \$100,000 which is accounted for by Temporary Loans of the same amount outstanding at the end of the year.

On Schedule A-1 will be found a computation of the so-called "Deficit" and of the Deficiency of General Fund Revenue for the year. There seems to be confusion as to the method of calculating the Deficit as the term is known in connection with the accounts of the City of Rutland. We believe the citizens are interested in two things, the Deficiency of Revenue for the year and the Deficit, or, more properly, Deficiency of Cash at the end of the year. Neither of these amounts can be correctly called a deficit.

A deficit for a municipality or other non-proprietorship enterprise is the amount by which the liabilities exceed the assets at a point of time. The deficit has been calculated, heretofore, by the use of two amounts only, namely, Cash in Banks and

Outstanding Temporary Loans without consideration of other assets or liabilities. A correct caption, therefore, for the various amounts called "Deficits" being discussed in the newspapers at the present time is Deficiency of General Fund Cash to Meet Outstanding Temporary Loans. **At December 31, 1936 this amount is \$62,769.40 (See Schedule A-1).**

Included in the payments, however, is an amount of \$10,237.74 advanced from the General Fund for special sidewalk construction in anticipation of the issue of bonds. It may properly be argued that the Deficiency of Cash should be considered as reduced **by this amount which would leave a deficiency of \$52,531.66.**

This situation illustrates the need of double entry book-keeping. When the position is taken that the amount of general cash spent for sidewalk construction does not affect a deficiency of cash, an account receivable is immediately created. With double entry books these expenditures would have been so treated when they occurred.

The balances of the Special Bond Funds (Library, Refunding, Mussey Brook Sewer and Main Area Sewer) aggregating \$10,588.84 are available for current purposes (subject to appropriation by the Board of Aldermen) as a result of the referendum in the March 1936 election. Since we are dealing with a Deficiency of Cash of the General Fund and this total is available for General Fund purposes (although not transferred), the total of \$52,531.66 may be further reduced by this amount to leave a balance of \$41,942.82. The foregoing figures will vary somewhat depending on what items are considered to be a part of the General Fund. In our calculations the deficiency is computed by deducting from outstanding loans of \$100,000 the Cash balances at December 31, 1936 shown on Schedule A-2.

The figures on Schedule A-1 and the proof on Schedule A-2 clearly show that in calculating the Deficiency of Cash by subtracting ending balances from temporary loans, the beginning balances are considered because the beginning balances are a part of the calculation by which the ending balances are determined (balances at beginning plus receipts minus payments equals balances at end).

On Schedule A-1 is also shown a Summary of the Deficiency of General Revenue of \$71,219.14 (revenue expenditures less

revenue receipts). By the same line of reasoning used in respect to the Cash Deficiency at the end of the year, expenditures for special sidewalks, in anticipation of bonds, may properly be deducted from this figure, leaving \$60,981.40 as the Deficiency of Revenue for the year which is the amount for which deficiency taxes should be assessed. The cash balances at the end of the year do not effect this total.

In some of the figures which have been published, the Deficiency of Cash at the end of the year and Deficiency of Revenue arising during the year have been confused. For example, in calculating the Deficit at the end of the year if the balances of all Special Funds including the Water and School Funds are to be considered, the Deficiency is \$33,933.37 from which may be deducted the amounts spent in anticipation of the issuance of sidewalk bonds, \$10,237.74, to produce a Deficiency of Cash to meet Temporary Loans of \$23,695.63. This amount is arrived at as follows:

Deficiency of General Fund	
Cash 12-31-36	\$62,769 40
Cash Water Fund 12-31-36	\$12,007 14
Cash School Fund 12-31-36	5,977 59
Cash Special Bonds and Other Funds	10,851 30
	<hr/> 28,836 03
	\$33,933 37
Expended for Special Sidewalks	10,237 74
	<hr/> \$23,695 63

In the published figures to which we referred in the foregoing paragraph, the net increases in the special fund balances from January 1 to December 31, 1936 have been used. Increases or decreases of cash during the year have no bearing on a deficit at "a point of time" except as they affect the ending balances. The balances themselves at December 31, 1936 should have been used.

The inclusion of balances of restricted revenue in the calculation of a General Fund deficit is incorrect. School Department revenue is not available for general purposes and Water Department revenue is available only under certain conditions.

Returning to consideration of Exhibit A it will be seen that, for the various Special Funds, the excess of revenue over expenditures is shown in black and the excess of expenditures over revenue in red. Three examples will suffice for explanation. The School Department actually spent \$1,068.78 more than the revenue received but the cash at the end of the year was less than the balance at the beginning of the year by an equivalent amount. There was no revenue in the Moon Brook Sewer Fund but there was a balance of cash at the beginning of the year amounting to \$3,599.33 which was added to the General Fund. The effect thereof is to show a transfer (red) out of this Fund reflecting an excess of expenditures over revenue which is offset by the decrease in cash.

To show the transactions in Temporary Loans, an additional column is inserted in which appear the revenue from Deficiency Taxes of \$103,938.19, Non Revenue Receipts (borrowings) of \$425,000 and payments of Temporary Loans of \$440,500 leaving a balance of \$88,438.19. Transfers to this Fund of \$11,561.81 include \$5,500 from the Main Area Sewer to repay a loan in 1935 and \$6,061.81 from the General Fund to provide, with the Deficiency Taxes of \$103,938.19, a total of \$110,000 for the payment of Temporary Loans outstanding at December 31, 1935. The final balance (\$100,000) of this column reflects the outstanding Temporary Loans at December 31, 1936 which offset the excess of expenditures over revenue and the increase of cash in the General Fund shown in the second column.

Summary of Fund Appropriation Operations—Exhibit B Detail Statement of Fund Appropriation Operations— Schedule B-1

On these statements will be found a summary and the details of departmental operations. The summary on Exhibit B shows the activities of the City divided into the General Fund, various Special Funds and the Temporary Loans Fund. The departments and activities under the General Fund show no beginning balances. Revenue added to Appropriations amounted to \$67,139.36. Appropriations (See Schedule B-1-B, page 2) total \$365,071.54. Transfers deducted and added total \$1,119.52 and \$11,040.62 respectively and the net total of these amounts aggregate an available total of \$442,132 which is accounted for by Expenditures of \$394,745.18, Appropriations Void of \$47,158.41 and balances forwarded to 1937 of \$228.41.

Under Unrestricted Revenue of the General Fund you will find that the opening balance, \$8,449.74, unrestricted revenue from which appropriations are made, \$262,765.13 less transfers of \$16,299.55 are deducted from total Appropriations of \$365,071.54 which leaves \$110,156.22 as over-appropriated revenue. Voided Appropriations of \$47,158.41 reduce this over-appropriated revenue leaving \$62,997.81 which, with the cash balance of \$37,002.19 is accounted for by Temporary Loans of \$100,000.

The details of General Fund Operations by departments, sub-divided by activities, are shown on Schedule B-1. These details are followed by similar details of the Special Funds so that the activities of the City are stated in tabular form for each department and each activity. A sub-schedule of the details of revenue and expenditures of the General Account appears as Schedule B-1-A.

Consolidated Balance Sheet—Exhibit C

For convenience and to show the type of information which will be available with double entry books we attach a Consolidated Balance Sheet of all funds as at December 31, 1936. We take no responsibility for the values of Inventories, Equipment or Plant Assets.

Included in the Balance Sheet are the assets for each fund, the liabilities, if any, and the resulting Surplus which is divided into Unappropriated Surplus and Appropriated Surplus, the latter meaning surplus which is restricted for certain purposes.

It should be understood that there is no reconciliation between the other statements in this report and Exhibit C, at least so far as the General Fund is concerned, because the other statements are prepared on a cash basis with no allowance for such items as Inventories, Bond Interest Accrued, etc.

The amount shown as Taxes Receivable includes taxes assessed as follows:

1936	\$35,780 54
1935	18,169 92
1934	12,134 30
1933	10,383 88
1932	9,573 69
1931	5,083 26

Prior to 1931	270 85
	<hr/>
	\$91,396 44

We have eliminated from Accounts Receivable accounts which have appeared in previous City reports totalling \$3,608.70 as follows:

Sprinkling Assessments	\$1,899 71
Sidewalk Assessments	270 45
Miscellaneous Accounts—Old	1,202 41
Water Rent—Meter—Old	236 13
	<hr/>
	\$3,608 70

These amounts appear to be worthless either because of age or the situations surrounding individual accounts.

You will note an asset of \$10,237.74 in the General Fund captioned Due from Other Funds which likewise appears as a liability of the Special Sidewalks Fund. This amount is the total of payments made from the General Fund for which reimbursement is to be expected when and if bonds for the sidewalks are issued.

The General Fund, including Inventories, Accounts Receivable and Obligations for Bond Interest Accrued and Accounts Payable shows an Unappropriated Surplus of \$162,983.65. The Water Fund shows a surplus of \$15,995.22 which we have considered to be unappropriated or available for general purposes. The Special Sidewalks Fund on Account of the liabilities to the General Fund and because it has no assets shows a deficit of \$10,237.74. The surplus of the Special Bonds Fund is considered to be unappropriated because we understand that these balances have been made available for general purposes. They include the unexpended proceeds of the Library bonds, the Mussey Brook, Moon Brook and Main Area Sewer Bonds. Temporary Loans Outstanding create a deficit of \$100,000 which we have deducted from Unappropriated Surplus.

The surplus in the Plant Fund has been considered as appropriated because it is unavailable in Cash and the Sinking Fund Surplus is "appropriated" since it is available only for the retirement of certain bonds.

Scope of Examination

Treasurer's Department

The Treasurer's receipts as recorded in the Cash Book were checked by sources of income so far as it was possible to do so. All payments were made by warrants signed by the City Treasurer, approved by the Finance Committee and countersigned by the Mayor and City Clerk. All warrants issued for 1936 were either examined or accounted for, and were checked with corresponding entries in the Cash Payments book to verify the entries and classifications. We made substantial tests of the invoices and payrolls supporting the warrants.

We proved the accuracy of the recorded Water Income, by summarizing the charges for the year and constructing a control account.

We reconciled the bank balances at January 16, 1937 with the books, confirmed the balances on deposit by certificates from the banks and examined the transactions between January 1 and January 16 to verify the book balances at December 31, 1936.

Tax Levy

We footed the Tax Book and the total proved with the taxes assessed. The taxes unpaid on October 10, 1936 were checked from the Tax Levy book to the record of Delinquent Taxes called Constable's Book. We added the Delinquent Taxes for 1936 and the total proved with the Delinquent Tax record.

Constable's Record

The Constable's remittances to the Treasurer on account of collections for 1936 and prior years were checked with the Treasurer's Cash Receipts book. We traced the amounts recorded in the Constable's Record for 1936 payments against the Delinquent Tax record in the Treasurer's Office. We found numerous errors which in total amount were negligible.

City Clerk's Office

The City Clerk's records of Licenses and Permits issued in 1936 were examined and the various Fees checked to the records of the City Treasurer. The amounts were in agreement with the exception of Fees for Dog Licenses amounting to \$56 which were collected in 1935 and paid to the City Treasurer in 1936. The City Clerk's Warrant Register was reconciled with the corresponding record in the City Treasurer's Office.

Commissioner of Sinking Funds

The securities, savings bank accounts and checking accounts in which the principal of the Trust Funds are invested were examined and the income of the various bonds was verified.

School Department

From records in the Superintendent's office we obtained a list of non-resident students and sent letters to the various towns to confirm the amounts paid the School Department. Approximately 96% of the towns replied and the amounts reported were in agreement with the tuition records at the School Department with the exception of one amount which was less than that acknowledged as received by the School Department. The tuition and other recorded items of receipts were checked to the City Treasurer's records. All of the vouchers drawn by the School Commissioners were examined together with supporting invoices and payrolls.

Charities and Corrections

In the department of Charities and Corrections we checked the total monthly bills of each vendor, as submitted to the Committee on Finance, to the Cash Payments book. We also examined the cancelled checks in payment of these invoices and checked them to the Cash Payments book. We reconciled the cash balance. All reimbursements made by the Treasurer were traced to the bank. The recorded receipts were traced to the books of the City Treasurer. We sent confirmations to the various towns in connection with the amounts paid to the City for aid of the needy. We received confirmations which checked with the records from approximately 70% of the towns.

Bonds and Loans

We examined the bond ledgers in detail. We counted the redeemed bonds therein for 1935 and 1936, checked the dates of redemption and the totals to records of payments. We found all properly cancelled coupons except those whose aggregate face value is \$516.75. We verified this amount by reconciliation and confirmation of the coupon accounts in the National Shawmut Bank and the First National Bank of Boston.

We verified outstanding temporary loans by correspondence.

Fidelity Bonds

We examined fidelity bonds of the following:

Board of School Commissioners
Sinking Fund Commissioners
Overseer of Poor
City Constable
City Attorney
Commissioner of Public Works
Commissioner of Public Safety
City Clerk
Purchasing Agent
City Treasurer
Asssitant Treasurer

We suggest that all persons who handle city funds be placed under bond, for example, Miss Brims in the Treasurer's office, the Superintendent of Schools, his secretary, and perhaps others.

General

We have made a more thorough examination of detail than is usually necessary or than will be needed in the future if double entry methods are adopted and find, with the exception of a few unimportant errors which were explained to our satisfaction, that the books and records are in good order.

Certificate

We have made an examination of the books and records of the City of Rutland, Vermont for the year ended December 31, 1936 and we hereby certify that all recorded income has been accounted for correctly, that all expenditures have been properly authorized by the officers and committee whose duty it is to approve disbursements, that expenditures appear to be allocated correctly to the respective Appropriations, that all cancelled bonds and coupons are accounted for, and that, in our opinion, the statements in this report subject to the comments herein and those in our Preliminary Report on Revision of Accounting Methods under date of January 28, 1937 accurately reflect the operations of the City of Rutland for the year ended December 31, 1936.

Respectfully submitted,

FRANK L. WILLIS & COMPANY

To the Finance Committee
of the Board of Aldermen,
City of Rutland,
Rutland, Vermont.

Gentlemen:

We have familiarized ourselves with the scope of the examination of the books and records of the City of Rutland, Vermont made by Frank L. Willis & Company by inspection of working papers and conferences with Mr. Willis and Mr. Rich and are satisfied to accept the findings contained in their report under date of February 4, 1937 of which this statement is made a part.

Respectfully,

JOHN W. BURKE

GEO. A. SABIN

ARTHUR E. CROWLEY
